

Accessing EdReady – A customized mathematical pathway

CCConline has a free EdReady (massive open online course) to prepare for the placement in a mathematics course. The MOOC has five options.

- Need to brush up on your math skills before taking the placement test, then select **Getting Ready for the Accuplacer** which focuses on the questions that appear on the Accuplacer. **Refresh your Math Skills** also provides a general review of the mathematics to enter MAT 121, MAT 120 or MAT 135.
- Already taken the placement exam but would like to advance into the next class, based on your goal, select **Get Ready for MAT 050**, **Get Ready for MAT 055** or **Get Ready for 121**. These opinions will focus on the skills needed to be successful in the course or help prepare you to retake the Accuplacer.

Follow the directions below to enter the MOOC and select your goal.

	<p>Log into: https://ccconline.edready.org/ Select Get Started</p>
	<p>Fill in the blanks and click on Sign Up Note: use your school email address</p>
	<p>Select your customized educational goal: Which course do you wish to enter based on your educational goal?</p>
	<p>Click on Go to Goal to take the initial diagnostic.</p>
	<p>Click on Start Assessment to take a diagnostic test.</p>
	<p>The Assessment give you a customized plan.</p>
