FACE COVERING GUIDANCE

FACE COVERING REQUIREMENTS

Due to the COVID-19 pandemic, MCC requires all students, employees, and campus visitors to wear a medical or non-medical facemask at all times when you are indoor on campus or unable to practice social distancing outdoors. The use of a facemask will help MCC prevent the spread of the virus on our campus.

Facemasks should follow current CDC recommendations.

EXCEPTIONS TO THE PROCEDURE

Some students, employees, or campus visitors may not be able to wear a facemask due to a pre-existing medical condition or other disability (e.g., asthma, respiratory disease, inability to remove a face covering without assistance). Exceptions/waivers for individuals will be evaluated on a case-by-case basis through an interactive process to determine a reasonable accommodation. Students, employees, or campus visitors who are asking for an exemption to this requirement based on a medical condition, should complete the exception request form at: https://www.morgancc.edu/nomask or work directly with the Vice President of Student Services (students or campus visitors) or the Director of Human Resources (employees or campus visitors).

For Students/Campus Visitors: Scott Scholes
Vice President of Student Services
Cottonwood 102a
970-542-3111
scott.scholes@morgancc.edu

For Employees/Campus Visitors: Julie Beydler
Director of Human Resources
Aspen 207
970-542-3129
julie.beydler@morgancc.edu

Advance notice of the need for accommodations/exemptions can help to ensure that there is adequate time to review the request and make a decision on a case-by-case basis. If a student, employee, or campus visitor is approved for an exception to the policy, they will be provided documentation indicating their exception.

FACE COVERING TIPS

- Face coverings must be used in conjunction with physical distancing (6 feet social distancing).
- Face coverings may reduce the spread of viruses and droplets from the wearer to others when properly sized and worn appropriately.
- Face coverings may reduce the likelihood that droplets from others enter the wearer’s nose or mouth.
- Face coverings may reduce the spread of aerosols from asymptomatic and pre-symptomatic COVID-19 carriers.
- Wash your hands frequently and avoid touching your face or eyes as much as possible.
- Face coverings should fully cover your nose and mouth.
